PROFESSIONAL SUMMARY

Analytical Junior Full Stack Developer specializing in Web Application Development, with a strong focus on backend logic, database management, and frontend integration. Through freelance projects and professional internship experience, I have developed solid technical problem-solving skills in C#, JavaScript, ASP.NET, and database structuring. Committed to continuous learning in full-stack development, modern frameworks, and industry best practices, I actively utilize my strong backend foundation and growing frontend capabilities to deliver responsive, data-driven applications and efficient code quality.

WORK EXPERIENCE

Junior Developer (Intern)
DOST Region IX
January 2026 – May 2026

- Built a serverless Rental Tracker Management System using Google Apps Script to efficiently digitize the financial tracking of agency-funded projects.
- Structured a relational database using Google Sheets API and wrote backend logic via JavaScript to automate financial waterfall schedules and custom grace periods.
- Created real-time dashboard analytics that eliminated manual computation errors for agency staff, ensuring precise visibility into collection statuses.
- Delivered high-quality work and received excellent evaluation feedback.

Full Stack Developer
Freelance / Self-Employed
2024 – Present

- Developed a centralized document request web portal for a school campus using the ASP.NET Core MVC framework, ensuring code quality.
- Designed the database schema in Microsoft SQL Server (SSMS) and implemented robust C# backend logic to manage request tracking, routing, and real-time status updates.
- Built a promotional web application for a local mobile beverage business to enhance their online presence and customer engagement.
- Integrated responsive front-end designs with back-end functionalities to display services, interactive menus, and handle booking inquiries.
- Maintained version-controlled codebases using Git and GitHub for collaborative development practices.

EDUCATION

Bachelor of Science in Information Technology (MAGNA CUM LAUDE)
DMC College Foundation Inc — Dipolog City
2022 – 2026

SKILLS

Programming: C#, SQL, JavaScript, HTML, CSS, PHP, Java, C
Frameworks & Backend: ASP.NET Core MVC, .NET Core, Object-Oriented Programming (OOP), RESTful API (Basic)
Database: Microsoft SQL Server (SSMS), Database Design & Normalization, Google Sheets API
Frontend & Tools: Bootstrap, WinForms (DevExpress), Git, GitHub, Visual Studio, Google Apps Script
Soft: Communication, Collaborative, Accountability, Adaptability, Leadership

ACHIEVEMENTS, TRAINING & CERTIFICATIONS

- Certificate of Recognition
- Best Capstone
- Academic Excellence Award in IT Subjects
- Best Intern Award
- Leadership Excellence Award
